| Wonnelfift | 8.40am – 4.00pm |
| Schönjochlift | 8.45am – 4.00pm |

On Wednesdays the pistes may be used by "First Track" participants from 7.30am.

Piste maintenance and snow-grooming vehicles with winch cables

We occasionally need to deploy piste maintenance machines on the slopes when they are still being used by skiers. Please ensure you keep a safe distance from such machines in the interests of your own safety. Please heed acoustic and visual warning signals at all times! After pistes close at the end of the day winch cables from piste maintenance devices present a potential hazard. The cable car operators accept no liability for accidents! Please note that in the case of persistent snowfall, groomed slopes may once again become snowed over prior to opening so that they may not always be completely frozen. As a result, moguls and piles of snow may form shortly after the ski slopes are in use.

Closure of pistes and avalanche blasting

For safety reasons, avalanche blasting may take place if large amounts of fresh snow have fallen. Detonations usually take place in the early hours before the start of regular ski operations. If there is a particularly large volume of new snow, avalanche blasting may also have to take place while the slopes are being used by skiers. The affected areas are then closed for skiing! Watch out for information at stations and terminals!

■ Nightflow & Night skiing Fiss (28.12.23 and every Tue. from 02.01. – 02.04.24) Möseralmbahn, Sonnenbahn 5.45pm – 10.00pm

■ Toboggan evening Fiss (21.12. & 26.12.23 and every Thu. from 04.01.24 – 04.04.24) Schönjochbahn, Sonnenbahn 5.45pm – 9.30pm Märchenexpress 5.45pm – 9.00pm

All further cable cars and lifts run daily from 9.00am to 4.00pm.

■ Exceptions in Serfaus

The Mittelabfahrt slope, Südbabfahrt slope and the Waldabfahrt slope Serfaus are closed from 6.00pm (except on Wednesdays: The Mittelabfahrt slope and the toboggan run are closed 5.00pm – 6.00pm, open from 6.00pm – 11.00pm for Adventure Night, night skiing & toboggan evening).

■ Exceptions in Fiss

The Ladisabfahrt, Poschiabfahrt and Winklabfahrt slopes are accessible daily from as early as 8.30am, the Möseralm and Winkl-abfahrt slopes are open for night skiing from 5.45pm to 10.00pm. During the toboggan evening, the tobogganing run is open for tobogganing from 5.45pm to 9.30pm.

On Wednesdays the pistes may be used by "First Track" participants from 7.30am.

Piste maintenance and snow-grooming vehicles with winch cables

We occasionally need to deploy piste maintenance machines on the slopes when they are still being used by skiers. Please ensure you keep a safe distance from such machines in the interests of your own safety. Please heed acoustic and visual warning signals at all times! After pistes close at the end of the day winch cables from piste maintenance devices present a potential hazard. The cable car operators accept no liability for accidents! Please note that in the case of persistent snowfall, groomed slopes may once again become snowed over prior to opening so that they may not always be completely frozen. As a result, moguls and piles of snow may form shortly after the ski slopes are in use.

Closure of pistes and avalanche blasting

For safety reasons, avalanche blasting may take place if large amounts of fresh snow have fallen. Detonations usually take place in the early hours before the start of regular ski operations. If there is a particularly large volume of new snow, avalanche blasting may also have to take place while the slopes are being used by skiers. The affected areas are then closed for skiing! Watch out for information at stations and terminals!

Backcountry skiing

If you intend to go skiing outside the secured area you are advised in the interests of your own safety to find out about the risk of avalanches, any planned avalanche blasting and weather conditions from the cable car operators. Various piste tours from the bottom stations are signposted in the ski resort.

Tobogganing

Please do not use the ski slopes. Use the tobogganing run or the signposted tobogganing slopes.

Skiing accidents

Please report the type and location of the accident to the nearest cable car station or terminal, or contact the mountain rescue services directly.

Inspections and fraudulent use

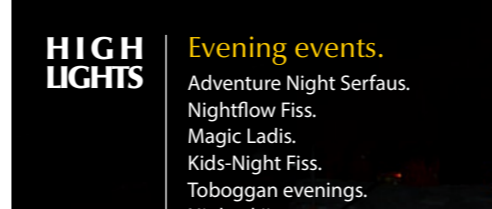

Admission checks are carried out at the cable car bottom stations using automatic scanners. Please follow the instructions of the staff and use the ticket inspection machines properly. On-the-spot inspections take place in the ski resort. Therefore, you should always carry your ski pass with you. Any incident of fraudulent use or bypassing of the scanners shall result in immediate confiscation of the ski pass. We reserve the right to report the offence to the police. Anyone caught in the inspection zones without a valid ski pass shall be required to pay a fine set at twice the allday ticket rate. A receipt showing that the fine has been paid can be used as a ski pass on the same day. Please note that under the Austrian cable cars liability act, only customers with a valid ski pass are covered for insurance purposes. Do not buy any ski passes from unauthorised vendors – such ski passes may be blocked! Furthermore, you are committing an offence by doing so! Our ski passes are subject to the "photo compare" access control system. This means that at the turnstiles of the feeder cable cars, a photo of the ski pass holder is sometimes taken, which can then be compared with images taken randomly when passing through technically equipped turnstiles in the ski resort. The corresponding pictures are stored in encrypted form and deleted after the ski pass has expired. With the purchase of a ski pass, you give your consent to data processing in the form described. It is also possible to purchase ski passes that are valid on a daily basis and are technically configured so that no photographs are taken when passing through the turnstiles (these ski passes are also randomly checked by our cable car staff).

Data protection

You can find our current privacy policy at www.serfaus-fiss-ladis.at/en/Data-protection.

Limitations on issuance of ski passes

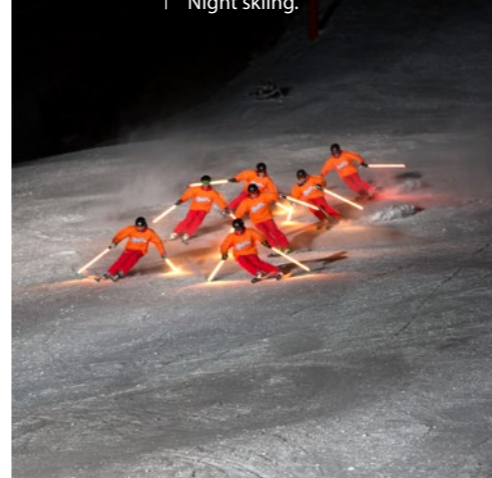

The members reserve the right to limit the issue of all or individual tickets in case of inadequate snow conditions or imminent overcrowding of the ski slopes. Members also reserve the right to change prices, even on a daily basis, especially for events.

NEWS.

The new 10-passenger Komperdell monocable cableway. Seilbahn Komperdell GmbH has invested over 60 million EUR in the new Komperdellbahn cable car, which will provide a new level of travel comfort from December 2023!

Everything is new! The cable car route now leads up to Komperdell along the Mittelabfahrt slope via the new mid station. The new mid station offers several advantages: Firstly, traffic is relieved in the Gampen area, as ski school groups can comfortably ski down the Mittelabfahrt slope to the mid station. Secondly, the last section of the descent can be bypassed with a downhill run from the station to the valley. Thanks to an additional (winter) hiking trail, the Leithe Wirt restaurant is only a few minutes' walk from the station. The new bottom station was built a little further north into the slope, making the access area to the Sunliner cable car as well as the front area between the Komperdell- and Alpkopfbahn cable cars much wider and more spacious. The "Check-In" ski storage at the bottom station was extensively enlarged and equipped with approx. 5,000 parking spaces. The top station has been integrated into the existing building at Komperdell, and all levels are now connected via escalators and lifts.

The new ski school area in the top station is at ground level, offering direct access to the Kinderschneealm snow park. The 10-seater gondolas have a transport capacity of 3,000 people per hour and boast a modern design and ample interior space. Skis and snowboards can now be taken into the gondola. To make it easy for children to get on and off, the lift travels very slowly in the stations; these areas are of course suitable for prams and are barrier-free.

SLOPE IMPROVEMENTS

Frommesabfahrt slope: On the popular Frommesabfahrt slope, the slope itself has been significantly widened in the lower area, ensuring greater safety and even more skiing enjoyment.

Mittelabfahrt slope Serfaus: The last section of the Mittelabfahrt slope (below the new Komperdellbahn mid station) has been completely redesigned, allowing almost all skiers to ski down to the Serfaus bottom station without any problems.

Viewing platform at the Schönjochbahn top station: You can reach the new viewing platform directly from the exit of the Schönjochbahn cable car barrier-free. From here you have a unique view of the surrounding mountains and peaks.
